"There are two reasons for choosing Open Text: the company's overall vision and willingness to partner with clients on solutions and the technology. *Livelink* is the most open and easiest to use of all the products we looked at."

—Mitch Oliver, Director of Web Strategy,
Qualcomm Incorporated

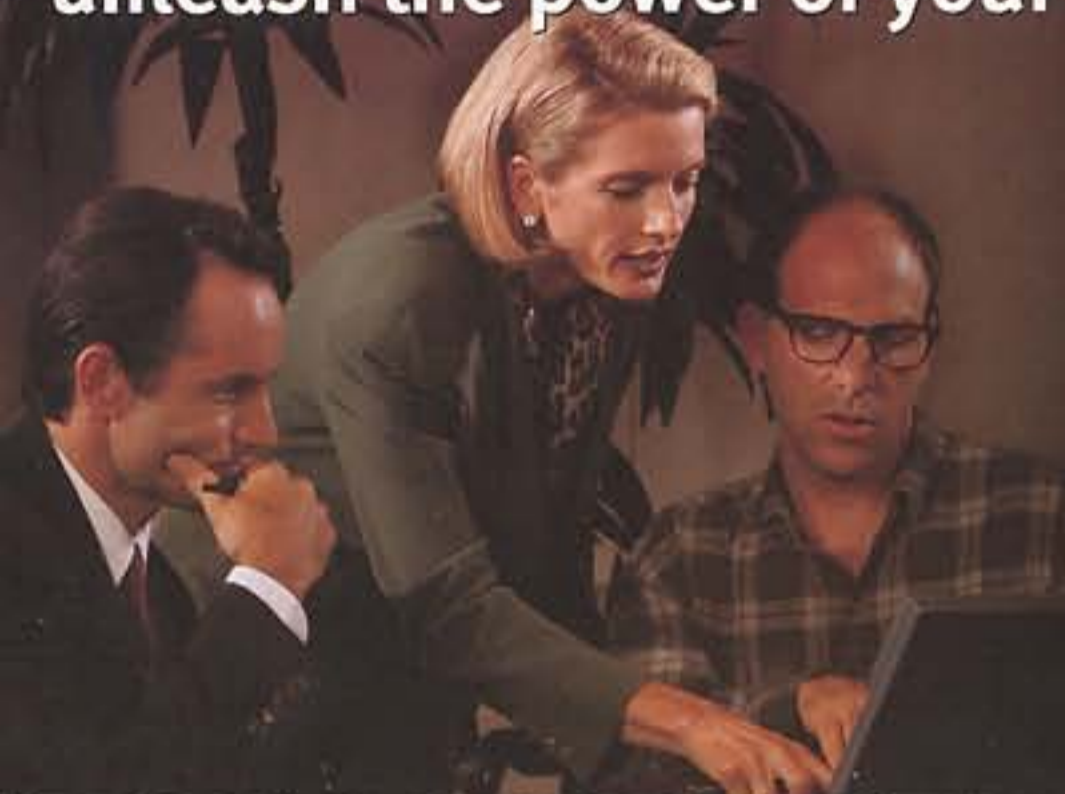

"*Livelink* will provide every Motorola employee with the tools needed to find information, work on it together and communicate, all through a standard Web browser, across a multitude of computing platforms, networks, and geographic sites."

—Mike Muegal, Project Manager, *Motorola*

"*Livelink* administration is carried out with virtually no client-side configuration. For our nearly 800 end-users, accessing information in *Livelink* will be a matter of entering a URL, then click and find. It is therefore transparent to the end-user..."

—Jane Edwards, Manager,
Technical Documentation
AT&T-Unisource Communications

Now with Livelink Intranet™ and a Web browser, you can instantly turn your intranet into...

A COMPLETE LIBRARY
...that helps you store, share, control access, and manage versions of every type of data and document in a completely secure environment.

INTELLIGENT CHANGE AGENTS
...that automatically bring you updates so you can effortlessly track information and processes as they change over time.

A POWERFUL SEARCH ENGINE
...that finds the answers you're looking for—across your corporate network and even on the WWW—so you can respond quickly to new challenges.

A PROJECT COLLABORATION AREA
...that empowers your organization to form teams to share knowledge and work together online in real-time to complete projects.

INTUITIVE WORKFLOW
A workflow engine that lets you automate your business processes without any programming.

IT'S EASY TO LEARN AND USE!
Livelink Intranet is a server-based application that

you access through your own standard Web browser. So, if you know how to use a browser, you already know how to use Livelink Intranet. And it automatically manages workflow steps—assignments, documents, milestones, and reviews—so users don't have to think about anything but their work.

IT'S EASY TO INSTALL!
Because a centrally located server handles the application while users access it through a browser, there's no client-side installation—and you can roll out rapidly. (Bell Canada deployed thousands of seats in several offices across Canada within three months of their initial pilot!)

IT'S AFFORDABLE!
Livelink Intranet gives you more value than any other intranet system in the world. And you can start small and scale up later. The more seats, the more cost-effective Livelink Intranet is. And with upgrades, backups, and administration on a fully server-based system, your client-side cost is virtually nothing!

IT'S SCALEABLE!
No matter how many people you want to link together in your organization, Livelink Intranet can handle it.

Companies like yours have used Livelink Intranet to bring together from 100 to 100,000 users!

IT'S FLEXIBLE!
You access Livelink Intranet through a browser, so it doesn't matter what kind of operating systems, hardware, or software you have. It supports just about any standard—from Windows to UNIX, from browsers to relational databases, from SGML to Microsoft Office™.

Add new applications with ease. Create or change features and applications for your unique business requirements.

Livelink

For The Hyperlinked Organization™

Livelink Intranet, "The Hyperlinked Organization" and "Putting The Web to Work" are trade marks of Open Text corporation. All other trade marks are the property of their respective owners.

REQUEST FOR FREE CD!

YES! I'd like to find out how to unleash the power of my company's intranet—to store documents, share knowledge, manage workflow, find information, and work together online—with a standard web browser. Send my **FREE Livelink Intranet Demo CD** immediately. I understand there is no obligation of any kind.

Why Livelink?

"With Livelink Intranet, we can take our valuable information resources and expertise, apply them to projects whose complexity mandates using sophisticated management and collaboration tools...Livelink's total, out-of-the-box integration...makes it an economic and operational imperative."

—Ed Vaccaro, CIO, Booz, Allen and Hamilton

"Livelink brings everyone together electronically and makes it easy to move our complex workflow through the intranet."

—Bert McLean, Technical Director, Vitro Corporation

"Documents are our business. Meeting our delivery dates with the Department of Defense is business-critical. Open Text is revolutionizing our processes so we're better able to manage reviews across locations, workgroups, and diverse computing tools. Now we are really leveraging the global reach and power of the Web."

—Kathie Zichke, Web Development Manager, TRW
